

- 📌 **Position:** Software Engineer
- 🏢 **Company:** Cypherox Technologies Pvt. Ltd.
- 📍 **Location:** Rajkot
- 🕒 **Employment Type:** Full-Time | On-Site
- 🎓 **Training/Probation Period:** 3 Months

🌐 About Cypherox Technologies

At **Cypherox Technologies Pvt. Ltd.**, we deliver innovative IT solutions with precision and passion. Our services include web development, mobile app development, Generative AI product development, and custom ERP & CRM solutions. We are committed to driving client success through cutting-edge technology, while fostering a collaborative work environment that encourages continuous learning, growth, and leadership.

🎯 Role Overview

As a **Software Engineer** at Cypherox Technologies, you'll work exclusively on web-based projects—building dynamic, scalable, and user-friendly applications for clients around the world. From front-end development to backend integration, you'll be part of a fast-moving, tech-driven team.

✂ Key Responsibilities:

- Convert UI/UX designs into interactive, user-friendly web interfaces
- Optimize web applications for performance, scalability, and responsiveness
- Ensure cross-browser and cross-device compatibility
- Maintain and enhance existing web applications by adding new features or fixing bugs
- Write unit tests and perform thorough testing to ensure application stability
- Create and manage RESTful APIs (if working on full-stack projects)
- Contribute to the documentation of code structure and technical workflows
- Stay up to date with modern web technologies and suggest innovative solutions
- Assist in deployment and release activities in collaboration with DevOps or senior engineers
- Follow secure coding practices to protect application integrity.
- Support junior team members or interns during collaborative projects (when applicable)
- Communicate development progress regularly to reporting leads
- Implement UI animations and transitions for enhanced user experience (if front-end focused)

💡 Skills Required

- Proficient in HTML, CSS, and JavaScript for building responsive web interfaces.
- Familiar with front-end frameworks like React.js, Vue.js, or Angular.
- Understanding of back-end technologies such as PHP, Python, or Node.js.
- Knowledge of relational and non-relational databases like MySQL or MongoDB.
- Ability to integrate and consume RESTful APIs and work with JSON data.
- Experience with version control tools like Git and GitHub/GitLab.
- Understanding of SDLC and Agile development practices.
- Skilled in debugging, browser tools, and basic unit testing.
- Strong verbal and written communication skills.
- Logical thinker with solid problem-solving abilities.
- Detail-oriented with clean coding practices.
- Capable of managing time and handling multiple tasks effectively.
- A team player who collaborates well with cross-functional teams.
- Quick learner with a passion for continuous learning and improvement.

✅ Eligibility Criteria

- Qualification: BE/BTech (CS/IT), BCA, MCA)
- Computer/IT background will be preferred

💰 Compensation

- CTC: ₹2.16 LPA

💪 Commitment to Growth

To foster long-term growth and leadership development, we seek a **2-year commitment** — enabling you to evolve from a learner to a future leader through meaningful responsibilities and hands-on client engagement.

THANKS
